

Claim 1: "The Natural Bibliographic Linking System" or "Nat-Link" invention is basically characterized for being a natural system and at the same time the most simple, objective, accurate and expeditious way of linking knowledge and information.

20121010 090529001

Claim 2: The "Nat-Link" system is not just a natural system and therefore an easy to deal with system, but is above all an exhaustive and integrated system, in contrast with the many contradictory approaches that are now being used in dealing with knowledge and information.
